

Leviton Network Solutions Certified Contractor Program Authorization Network Installer Participant Requirements:

All program participants are selected based on their experience, expertise, and high level of professionalism. Only contractors that meet these expectations are considered for the program, and only participating contractors in good standing are eligible to receive Leviton Network Solutions Extended Product and Performance Warranties for their customers. Leviton Certified Contractor Program participants are obligated to provide the end user the highest quality installation. The objective of the program is to provide assurance to the end user that their structured cabling system has been properly designed and installed using high quality components and standards compliant installation practices.

Authorized Network Installer Participation Requirements:

- Installer Company must be approved for participation in the program by Regional Sales Manager & Certification Program Manager.
- Installer Company must be low voltage licensed and bonded in the regions they conduct business where required.
- Installer Company personnel must attend Leviton specific Certification course which includes classroom training with extensive hands-on curriculum. Personnel shall include Lead Technicians and/or on-site Project Managers.
- At least 30% of the Installer Company technicians must attend certification and/or maintain equivalency through BICSI certification.
- Installer must subscribe to the highest levels of workmanship and adhere to the structured cabling standards as detailed in ANSI/EIA/TIA 568 Series and/or ISO design and installation standards.
- Company to be certified shall have a minimum of 6 years verifiable experience installing telecommunication systems.
- Installer Company must maintain personnel and capital resources sufficient to complete projects or networks consisting of 250+ workstations.
- Agrees to use only approved Leviton Structured Cabling product(s) from for those projects requiring an extended warranty from Leviton.
- Owns and maintains UL Level III or higher approved and recognized instruments designed specifically for the purpose of certifying copper and optical fiber structured cabling systems.
- Own and maintain an industry recognized fiber optic light source and meter (OLTS).
- Maintain and monitor an active e-mail address.
- Utilize record keeping system ensuring complete and accurate documentation of certified and warranted projects.
- Contractor renewal period is every three years.
